THIS DRAWING IS COPYRIGHT AND REMAINS THE PROPERTY ROGER PARRY & PARTNERS. ---->---->--Dirty water from wash down will be collected in in 500 litre tanks, which will be taken by vacuum tanker and exported. The tanks will be compliant with SSAFO Regulations 9Wales) 2010 Standards. The clean and foul water drainage systems will be kept separate in order to ensure no ٠h pollution incident occurs to the environment. _--->-Clean water from roof and clean surfaces to open and stone filled infiltration trenches and a piped system each side of the buildings. It will be collected in an underground storage tank with 2000 gallon capacity to be used for washing down purposes. Any surplus clean water will drain into existing soakaways and will be directed away from existing surface waters. At the wash down stage the clean water system around the yard will be switched to the underground dirty water tank. Soil type: Freely draining acid loamy soils over rock.
