THE ORIGINATOR SHOULD BE NOTIFIED IMMEDIATELY OF ANY DISCREPANCY. THIS DRAWING IS COPYRIGHT AND REMAINS THE PROPERTY ROGER PARRY & PARTNERS.

Notes:

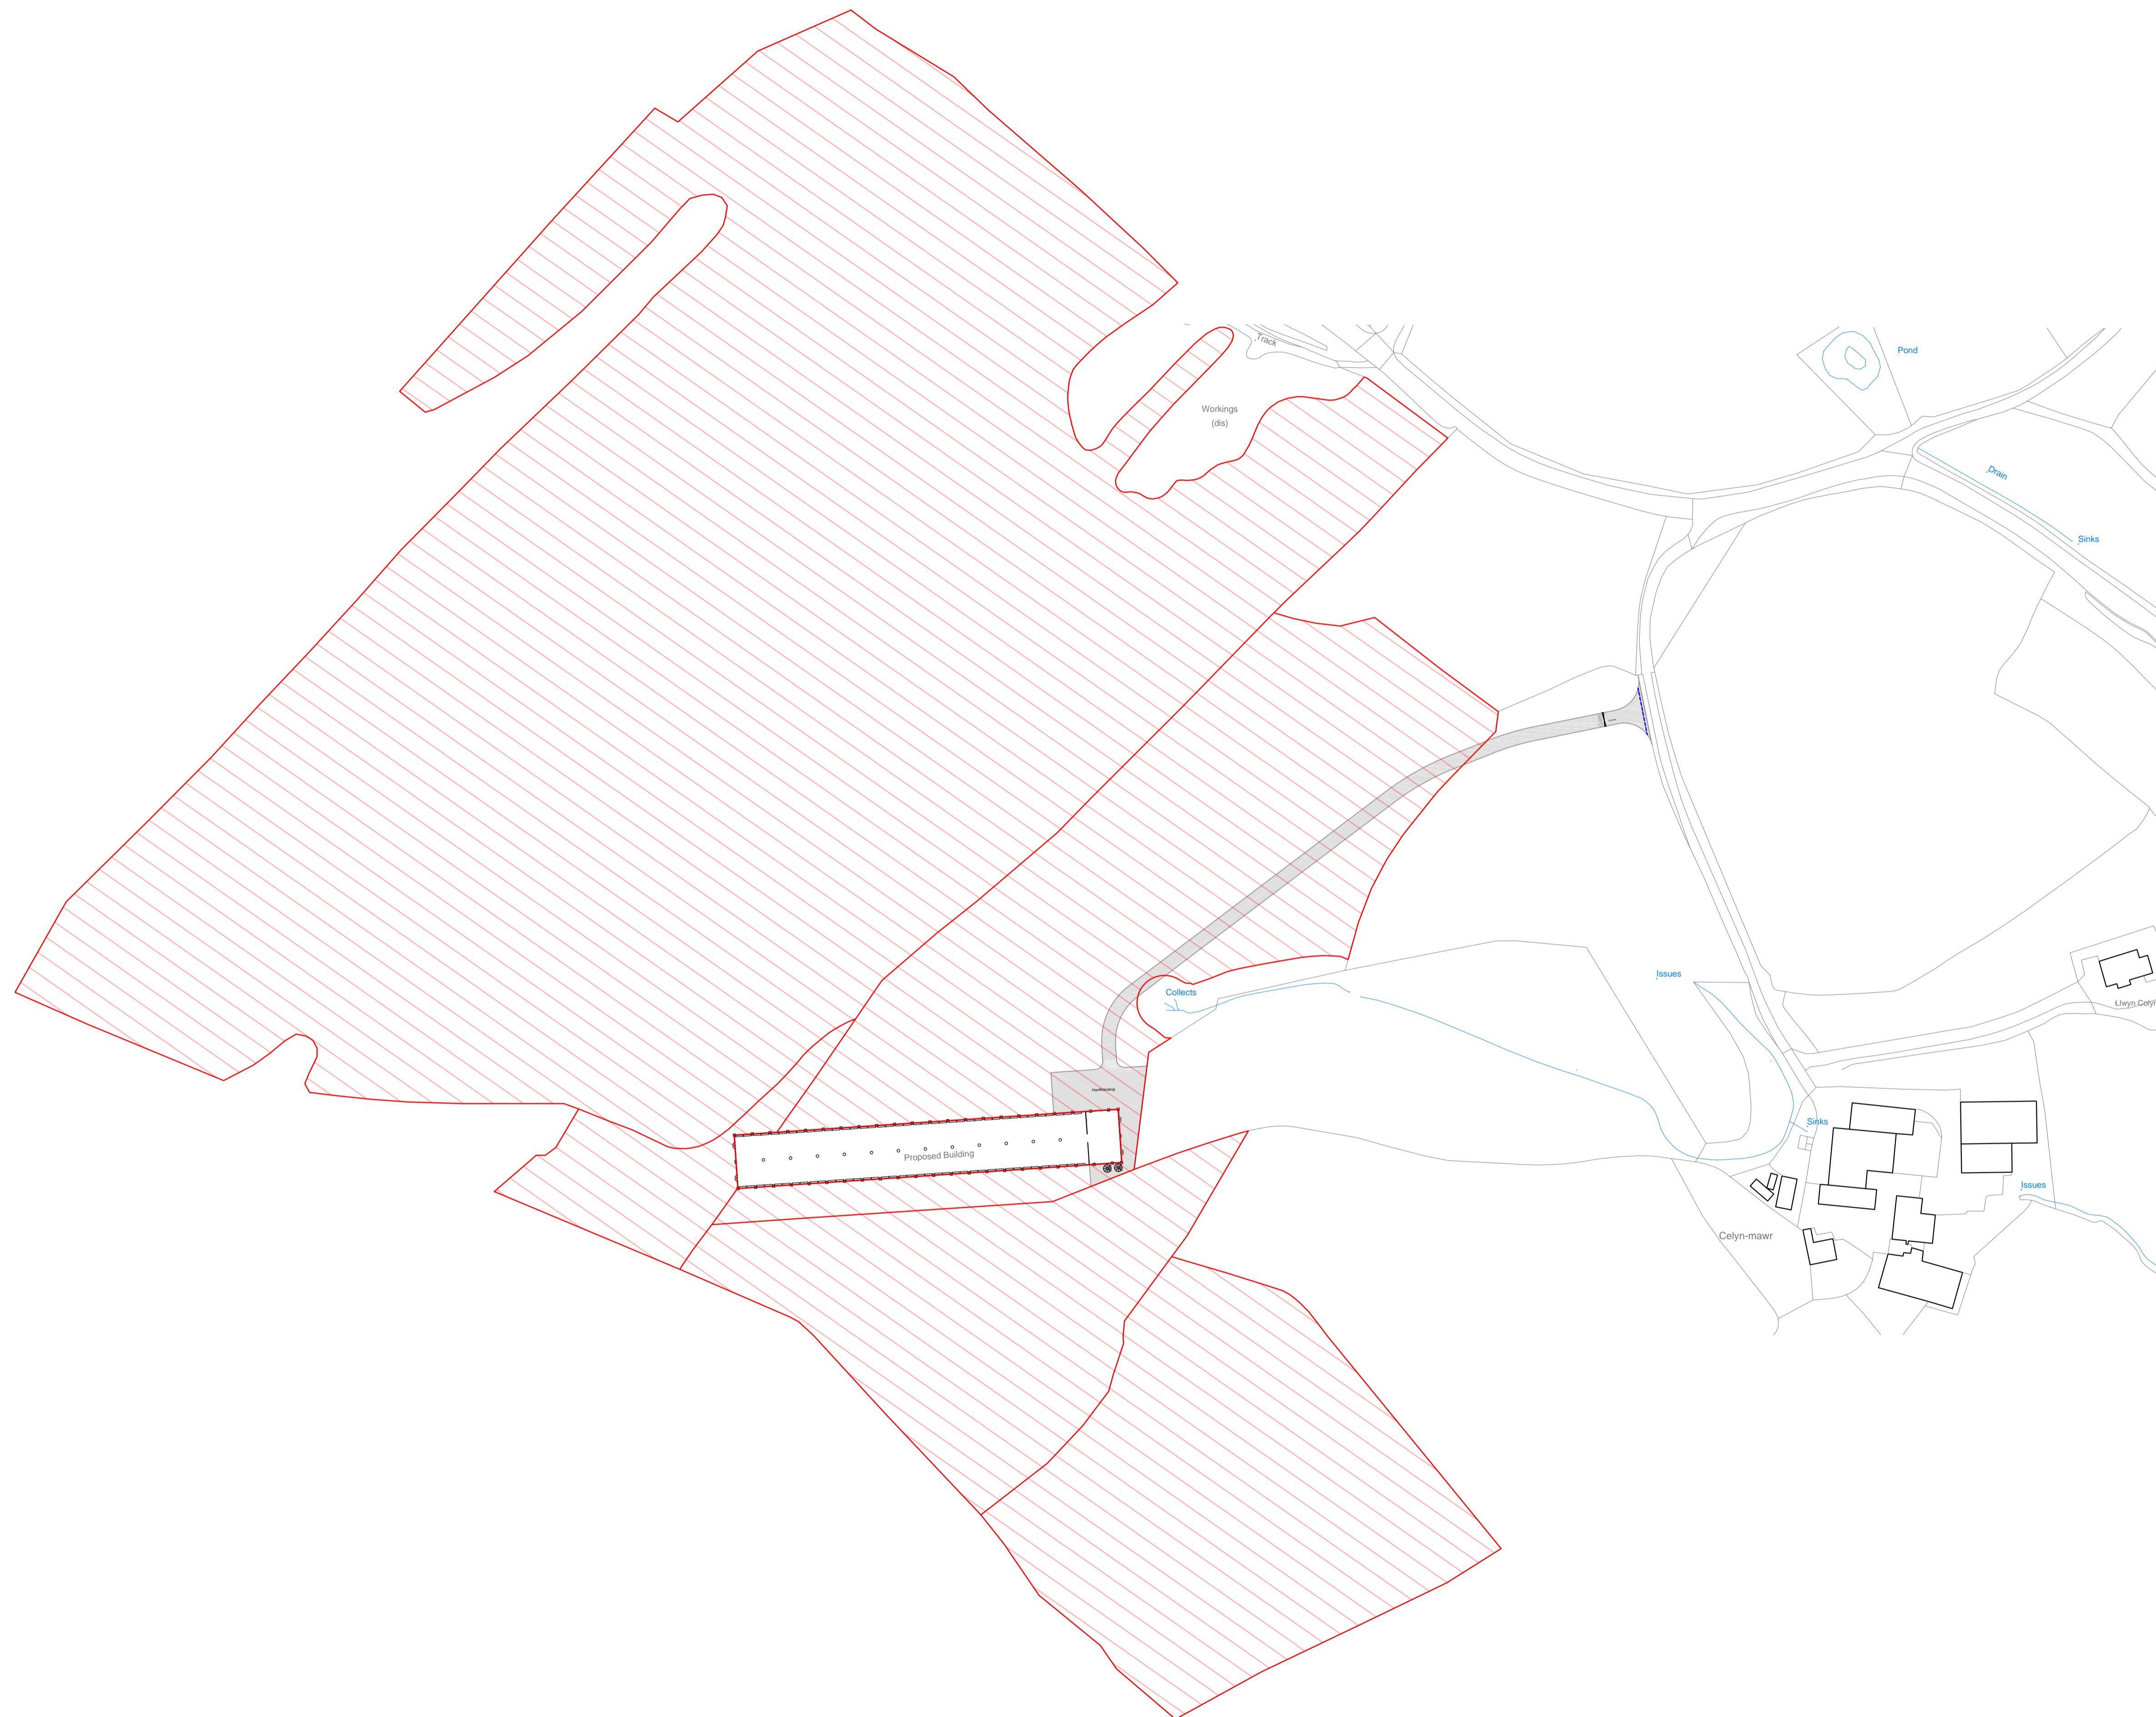

Ranging Area

Total area within range:
40 acres

Any watercourses running through the ranging areas are to be fenced out.

The birds within the free range unit will graze the designated land in a rotational field system. The birds will step out of the building through the pop holes provided and onto a veranda, which shall ensure that the ground is not poached and compacted by the birds. The veranda shall also ensure that the feet of the birds are cleaned prior to entering the building. The birds will then be directed to those fields available for grazing in rotation to prevent over stocking of the ground and ensure the fertility of the soil. Good pasture management is essential and it is paramount the problems of parasitic intestinal worms and coccidial oocysts are avoided.
