Dirty water from wash down will be collected in an underground sealed tank, which will be taken by vacuum tanker off farm. The tank will be compliant with SSAFO Regulations (Wales) 2010 Standards.

Clean water from roof and clean surfaces to open and stone filled infiltration trenches and a piped system each side of building. It will be collected in an underground storage tank with 2000 gallon capacity to be used for washing down purposes. Any surplus clean water will drain to existing ditches. At the wash down stage the clean water system around the yard will be switched to the underground dirty water tank.

The clean and foul water drainage systems will be kept separate in order to ensure no pollution incident occurs to the environment.

Soil type:  
Freely draining slightly acid loamy soils.
