The underground storage tank for dirty water will be constructed to meet SSAFO Regulations (Wales) 2010 Standards.

All dirty water from wash down will be collected in an underground sealed tank, This will then be tankered out as necessary and applied to the land in accordance with the planning justification statement - Manure Management Section.

Clean water and foul water systems will be kept separate to ensure no pollution incident occurs to the environment.

Clean water from roof and clean surfaces to open and stone filled infiltration trenches and a piped system each side of building. Then discharged into the stream adjacent to the unit via soakaway.

At the wash down stage the clean water system around the yard will be switched to the underground dirty water tank.
