

### Notes

Clean and dirty water systems are to be kept separate.

#### Sealed Tank

A 10,000 litre SSAFO compliant dirty water storage tank will be provided as shown so that in the event where disease control disinfectants are used they will be placed in dirt water tank and collected by approved disposal company.

#### Soakaways

The soakaways will be directed away from the existing surface waters and to an area where water table is not high. Clean water from roof and clean surface to stone filled infiltration trenches. At wash down and clean water systems switched to dirty water tank

rhosddu

Site Area 3000 m<sup>2</sup>

Dwg Notes:  
Do not scale, use figured dims only. Dims displayed in millimeters unless stated otherwise. All dimensions to check on site prior to commencement, any discrepancies to be report to designer.
