

Existing Access
 Existing access improved to provide 59.0m visibility in both directions from 2.4m back from highway at the center of the access. First 20.0m to be of standard 450mm construction to L.A. highways requirements with tarcamdamed finish. First 20.0m to be max gradient of 1:15 and at right angles to existing highway. Any access gates are to be set back 20.0m from the highways edge.

Key

 - Existing hedgerow, translocated as required

10.0m radius

Hedgerow translocated and gate way layout reconfigured to allow for new access track

Center line of existing hedgerow to be translocated to 1.0m behind the line of visibility

Existing post and rail fence to be retained

Existing farm access track

Draw Notes:
 Do not scale, use figured dims only. Dims displayed in millimeters unless stated otherwise. All dimensions to check on site prior to commencement, any discrepancies to be report to designer.
